## Alberta Grain To Seek International Honors

Alberta entries will again be heavy at the Chicago International Hay and Grain Show, according to Provincial Field Crops Commissioner W. J. Stephen, and some splendid samples from this province will compete with the best from all parts of the continent. Herman Trolie, of Wembley, winner of the world's championships in both wheat and oats at the 1926 show will again be among the exhibitors this year. In addition to a number of prize-winners in previous years, the names of several new growers appear in the following list of entries received by Mr. Stephen: Arthur Morin, Vinny; Roland S. Young, Wembley; C. Edwards, Delta; Geo. L. Bailey, Mirror; J. C. Buckley, M.A., Glendon; J. H. Coates, Ingle; R. H. MacDonald, Trochu; Thomas Knowles, Irma; W. A. Day, Machod; H. G. Dunfield, Delta; Douglas Ward, Okotoks; W. G. Gair, Killam; M. Schellenberg, Spruce Grove; D. M. McRae, Sedgewick; John McEwan, Braintree; B. Harvie, Edgerton; R. A. Meeks, Manville; Andrew McSparran, Chauvin; Nels Linden, Wetaskiwin; R. H. Henox, Rochford Bridge; Hans Mayer, Vegreville; Richard Harrison, Oshaw; Albert Strong, Calgary; A. B. Leslie, Sedgewick; S. L. Philpott, Strathcona; and J. H. B. Smith, Wolf Creek. A number of entries not included in the above list are expected from the Brooks district.

H. A. BROWN,

whose appointment as Vice-President and General Manager of the General Motors of Canada, at the age of 27, marks him as one of the youngest higher executives in the automotive industry. Mr. Brown has been connected with the General Motors organization for a number of years having held the position of controller at Oshawa since September, 1924. He succeeds Gordon Lefebvre, who has assumed an important post with the Oakland Motor Car Company at Pontiac, Michigan.

## Alberta Trade With Orient

Good prospects for the exportation of Alberta livestock to Japan now exist as a result of the visit of Captain T. Kawakami, of Yokohama, who has spent the past month looking into conditions in this province. Following the visit of H. A. Craig, deputy minister of agriculture, to the Orient two years ago and the trial shipment of stock sent over at that time, the extensive interests in Japan which Captain Kawakami represents are interested in the importation of beef cattle for slaughter and beef and dairy cattle, horses and ewes for breeding purposes, on a scale which will greatly increase the volume of Alberta's trade with the far east. If the plans at present contemplated materialize.

## Alberta Hospital Association To Meet in Edmonton

The Alberta Hospital Association and the Alberta Association of Registered Nurses will hold their annual joint convention in Edmonton on November 21 and 22. One of the features of the meeting will be addresses delivered by Dr. McEachern, director of hospitals for the American College of Surgeons, who is recognized as the leading authority on hospital methods on the continent.

## Alberta Fish for Chicago Market

A large shipment of salmon trout from Lake Athabasca to Chicago recently indicates a forward step in one of Alberta's growing industries. The Lake Athabasca Fisheries, Ltd., has gone into the business of supplying the large markets of the United States with the popular product of Alberta lakes. A large plant and ice houses along with dwelling accommodation for fifty employees have been erected and plans are made for further enlarging the business as the market demands.

## Alberta Cattle Top Chicago Market

Forty-one head of Alberta grass-finished steers shipped by P. Burns & Co., to Chicago recently set a new figure on that market for this class of cattle during the season. These steers sold at \$14.65 per hundred pounds, exceeding the previous high price of 48 cents. Good prices on the American markets have attracted large shipments of cattle from the western provinces during the past few months.

## Carhart Cotton Mill-Book Factory Site in West

Edmonton, along with other cities in the West is being investigated by the Hamilton Carhart Mills Ltd., the largest manufacturers of overalls in the world, as a possible site for the establishment of a western factory and distributing centre. The Carhart factory, it is stated, would employ some 50 persons and have an annual payroll of around \$150,000.

# Growth Of Canada's Trade Has Not Been Surpassed By Any Other Country

A survey of Canada's material and agricultural development in the past 60 years, an optimistic outline of what the future holds for the Dominion, and a tribute to those who were contributing towards further cementing the friendly relations that have existed between Canada and the United States for over a century were given by the Hon. J. E. Macdonald, Minister of Trade and Commerce in the Canadian Government, when he addressed a largely attended meeting of the Canadian Club of New York. Mr. Macdonald quoted widely from figures that showed Canada's continued trade expansion and drew from them the lesson that with the same industrious application to the art of peace in the future, the Dominion could not fail to achieve great things.

Touching on Canada's growth, Hon. Mr. Macdonald said too many were inclined to judge progress of a country by growth of population alone, which was not always a sound basis. In Canada material advancement had been much more rapid than increase of population and in no direct ratio. The standard of citizenship in a country was of vastly more importance than density of population. The minister referred to the small development of the Dominion since Confederation. The development of the country's trade in the past 60 years reflected her increasing importance in the economic system of the world, a growth, he said, which had not been surpassed in any other country.

Mr. Macdonald touched briefly on the number of Canadians who had gone to the United States for "peace opportunities" seemed greater for individual advancement," he said, "than Canadians moved to this great land and assisted in its development. To-day, I believe, we are seeing evidence of the opposite swing of the pendulum. I firmly believe that no small place in the future development of Canada will be taken by the sons of former Canadians who have helped to develop this great country. It is natural that with a common language and no great intervening distances opportunities in Canada should appeal to the citizens of this country just as opportunities here have appealed to Canadian citizens."

## Black Bass In Saskatchewan Lake

Game Fish Brought From Minneapolis And Will Be Introduced To Prairie Lake

Fishermen who like to fight for their game will be able to get their sport in the heart of the Canadian prairies in the very near future. For the first time, a prairie lake will open its waters to the gamey black bass when the Dominion Fisheries Inspector for Manitoba brings 1000 to Saskatchewan, 4,000 fingerlings, which he is transporting in cans from Minneapolis. While the fish are in the experimental, officials of the Fisheries department are satisfied that the fish will do well in their new environment. They will be placed in Madge Lake and other waters near Kamack.

## Western Forest Reserves

Now Used Extensively For Summer Camps and Recreational Purposes

One of the striking features in the development of Dominion forest reserves or national forests in the Prairie Provinces has been their growing use for recreational purposes. People hold picnics in the forests, camp out in them, and, in some, build summer cottages in designated areas. This recreational use of the forest reserves in no way interferes with the carrying out of the main purposes, in the production of timber, the protection of stream-flow, etc., for which these areas were set aside.

## Western Dairy Industry

A recent summary of the Dairy Industry in Western Canada, that the provinces of Alberta, Saskatchewan and Manitoba, now account for nearly 25 per cent. of the latter output of the Dominion, will only recently they did not provide enough even for their own requirements. The export largely to Great Britain and the Orient.

## Grow Enough Potatoes

Saskatchewan will have enough potatoes for her own needs this season without the need of importations, judging by the report of the Dominion Bureau of Statistics, which puts the crop at 2,617,000 last year, or an increase of 587,000 over last year.

W. N. U. 1732

## Research Work In Wool-Growing

Plans To Help Farmers and Manufacturers in Canada

Plan for research work in connection with wool growing and wool manufacturing in the Dominion with a view to helping both farmers and manufacturers were completed at a recent meeting in Toronto of a special committee of the National Research Council under the chairmanship of Dr. H. M. Tory, of Ottawa. Dr. Tory urged the utilization for sheep raising of land in Canada unsuitable for other purposes, textile education, courses in technical schools, courses in universities and research in unemployment. Committees were formed to implement the plans outlined at the meeting.

An interim report on the quantities and qualities of wools used by Canadian mills disclosed the fact that the bulk of imported wools were produced from types of wools which were or could be grown in Canada. Methods of testing Canadian wools for their suitability for manufacture into types of cloth used in Canada were discussed and the opinion expressed that there was a large and unexplored field for research in the chemical properties of wool.

## Ranching In Alberta

Province Supplying Large Quantities Of Prime Beef For Eastern Markets

Though cattle ranching in Alberta is not now the extensive business it was twenty-five years ago, the annual feeder-cattle show and sale held recently in Calgary, demonstrated that the ranches and farms of Alberta still supply large quantities of prime beef cattle to eastern and other markets. This year's show attracted a record number of competitive entries for the \$7500 in prize money. Most of the land in Alberta that a quarter of a century ago was the exclusive pasture field of many thousands of beef cattle is now producing mixed farming products, with dairying as one of the most profitable branches. Alberta is the third largest producer of butter of the nine provinces of Canada, with no counting output of about 20,000,000 pounds, and a yearly agricultural revenue valued at about \$225,000,000.

## Pasteurizing Milk In The Home

A Very Simple Method That May Be Used Without Trouble

Milk and its products are indispensable to the growth of the child and for the health of the adult, but in using it, especially for children, many persons like to be absolutely certain of its freedom from germs. Pasteurizing is the best way of obtaining this certainty, and the process can be easily carried out at the home if it has not already been done at the dairy. A simple method is described in a pamphlet on "Why and How To Use Milk," available at the Publications Branch of the Department of Agriculture at Ottawa. No elaborate or expensive equipment is necessary. If milk is bought in bottles, pour it into a small glass dairy thermometer through a hole in the cap of one bottle, and set the bottles on a clean folded towel in a tin pail and pour in warm water until it reaches level to the top of the bottles. Place the pail over a fire and heat the thermometer registers 145 degrees F. He move from the fire for 30 minutes, re-heating necessary to keep the thermometer at 145 degrees. After 20 minutes pour in cold water and cool the milk as quickly as possible to 50 degrees. Keep as cool as possible until it is used. If there is no thermometer at hand the water should be heated until the bottles kept in it for thirty minutes. The pamphlet contains a large number of recipes in which milk is an important ingredient.

## People With Historic Names

Several Come To Mind Who Are Living In England

The marriage in Westminster Abbey of Lady Jane Grey must make many people wonder how many holders of historic names exist today. That came readily to the mind of Sir Robert Peel, Miss Heather Lillie's husband and a direct descendant of the great Prime Minister, and Sir Herbert Wakefield, who lived in the Peel and provided the most thrilling story for boys, Sir Herbert Wakefield lives in Northampton.

## Profit In Market Garden

A Vernon, B.C., man, A. D. Monahan, has apparently solved the fruit and vegetable marketing problem for nine acres of land he grows corn, tomatoes, peas, beans and spinach. So excellent is the quality that the entire crop is marketed. So good are the returns that he always winters in the States.

## Noticeable Decrease In Shipment Of Anthracite To Canada

Canadians to whom the United States formerly shipped as much as 4,000,000 tons of anthracite coal annually, are now buying very much less, declared Samuel D. Warriner, Philadelphia, chairman of the Anthracite Operators' Conference and president of the Leigh Coal and Navigation Company, at a dinner in Scranton, Penn.

The decrease in Canadian anthracite coal purchases in the United States is due to the effect of the shaggy, European goods for Empire citizens; as well as the prices at which English coal has been sold.

A live wire is a much newer thing to be than to fool with.

Saleslady: "Yes, sir. What shade of almond?"

## A Profitable Side Line

Farmers Have Found Bee-Keeping Yields Large Returns

Bees in an occupation that often yields a good profit, and combines a healthy outdoor work in pleasant weather with the fascinating study of an insect whose marvelous habits are a subject of absorbing interest to the nature lover. All kinds of people may keep bees, and they may keep them in the city or country. With a little help for the heaviest work, women often make successful beekeepers. Many farmers have found that as a side line bee-keeping gives as large a return as anything else on the farm. The successful management of an apiary does not require the expenditure of much time, but it does require an accurate knowledge of what to do and when to do it. To make this knowledge easily available to Canadians the Department of Agriculture has issued a comprehensive bulletin on "Bee and How to Keep Them," which may be obtained from the Publications Branch of the Department.

## Beef Grading Plan

Meetings Held To Hear Evidence Of Producers, Retailers and Consumers

Proposals to grade beef for market as has been done in the case of eggs, butter, and other products, are being considered by a commission appointed by the Dominion Government. This commission, which included R. S. Hamer, of the Dominion Livestock Branch, Ottawa; J. H. Evans, president of the Western Canada Livestock Association; and L. P. McLeod, of Ottawa, held meetings during the past month, listening evidence from producers, retailers and consumers as to the probable effect of a system of grading on the marketing of western beef.

## Record Crop Of Garnet Wheat

Sixty-five Bushels To The Acre Grading No. 1 Northern

A record crop of garnet wheat, yielding bushels per acre, was reported from the northern grade, is reported by J. Siebert, whose farm is two miles west of Edmonton City limits on the Road to St. Albert. Thrushes of this crop has been finished and the yield is the highest yet reported in the Edmonton district. A field of 25 acres was the last one sown this year and was the first cut, with the result that it yielded 3,235 bushels.

## Purchasing Of Big Farm

Two Thousand Five Hundred Acres Farm Sold Put Through In Saskatchewan

A deal for a 2,500-acre farm at Estevan, Saskatchewan, has just been completed by the Canada Colonization Association, with headquarters at Winnipeg, reports H. E. Christensen, superintendent of the association in Saskatchewan. This tract is to be occupied by seven families. This year's total settlement in the province by the association to date runs to 175 families and will likely reach 250 before the end of the year.

## Establishing Settlers

British Government Spends \$4,500,000 In Establishing Settlers On Canadian Farms

With the completion of the 2,000 family settlement scheme this year the British Government will have invested \$4,500,000 in establishing settlers upon Canadian farm lands. In addition to this the families have brought \$1,500,000 with them, according to figures by the Department of Agriculture, so that the total cost of investment in agriculture as a result of the scheme is at least \$6,000,000.

## Wears Out In Six Weeks

During the recent British National Day and Honey Show at London, it was reported that the famous honey bee, if he is hatched in the summer months and finds plenty of work to do, wears himself out, runs his life out in most badly patches, and dies (often in his joints, and dies of old age) by the sixth week. On the other hand it was shown that the best honey bees near the winter months may reach the age of six months. The queen bee, however, will live for five years.

## Winnipeg As Aviation Centre

Large Airplane To Be Built For Use Of Air Liners

Winnipeg is soon to be a great aviation centre with a large airplane to be built there from which air liners will leave regularly for all parts of Canada, according to H. A. Oaks, Manager of the Western Canada Airways, which has moved its headquarters from Hudson to Ottawa. Three new monoplane have already been ordered by the company and not less than six are to be purchased next year. The new machines are made necessary by the growing popularity of air travel, according to company officials. During the last eight months of the year the company carried more than 1,000 passengers, about 20,000 lbs. of express, and flew 100,000 miles in 1,500 flying hours.

## Poland's Savings Deposits Are Growing Rapidly

"Till 'Crown X' Foot 'March'."

Possibility of war between the United States and Great Britain, with Japan as a British ally and Canada neutral, is seen in the last editorial by Lieut. Commander J. M. Kenworthy, M.P., in his book, "Peace or War?" soon to be published in the U.S.

"If events were in the next ten years as in the past," he writes, "England will stand at the head of the European federation of distrust against America. If after 1931, there is no renewal of the Washington Treaty of 1911, the world will accept the possibility of a devastating Anglo-American war. It would mean the end of civilization and the ruin of human culture."

Commander Kenworthy, member of the English house of commons and former member of the British House of Commons, is a staff, sees mistrust between the British and American people as latent and only capable of being fanned into a consuming passion. Upon the selfishness of both countries he lays the blame for the conditions he alleges.

"We muddle and drift and blunder," he writes, "hoping for the best. We shall get the worst. The stupid nationalism of the experts is largely to blame for the gathering storm of the two nations in naval affairs. The still more stupid readiness of both nations to follow their leaders is even more culpable."

Jealousy of financial leadership of the United States, bitterness of the British people over payment of the war debt, and mounting commercial rivalry all are cited as factors in the situation.

The writer says a naval alliance between Japan and Great Britain would bottle up the Panama canal and destroy the mobility of the United States fleet, leaving the nation at the mercy of its attackers.

Discussion of naval policy, credits and preparedness, he writes, might well be abandoned at arms conferences for more important and immediate practical considerations. He believes, after the latter, he says, would be settlement of the issue of naval bases, the question of the right of passage in the North Atlantic, the right of passage in the North Atlantic, but in the event of war between the two nations such fortification would be of tremendous strategic value to Britain.

Other war possibilities outlined in the volume are that of a conflict between Great Britain and Russia. The writer maintains that rivalry in the Orient may bring an outbreak there sooner than is expected. Russian army officers, he writes, are ambitious for a conquering role.

An introduction to Commander Kenworthy's book is contributed by H. G. Wells.

## Hens Lay Larger Eggs

Educational Work Of Poultry Associations Given Credit

Because of the educational work of poultry associations and such organizations, hens are now laying larger eggs, was one of the main contentions of C. N. Han, Montreal, chairman of the Express Trade Association, in urging the Board of Railway Commissioners at a session in Calgary, that the board grant permission to establish an estimated weight for billing of 25 pounds, or 20 dozen cases of eggs, instead of the present estimated weight of 25 pounds.

## Increasing Mail Service

Increased rural route services for Alberta and the three other Western Provinces, with the possibility in the future of an extension of the service to the Prairie Provinces, are two matters which are occupying the attention of the postal authorities of Canada, according to Hon. P. J. Yonke, postmaster-general of Canada.

There are 12,370 post offices in Canada, 24,000 miles of telephone wire, and over 1,000,000 telephones with a three million wire mileage.

## About Town and Country

The United Church bazaar, sale of home cooking and afternoon tea, will be held in the Cooper Trading Co. building, Main Street, on Saturday, November 12.

John F. Miller, Eye Sight Specialist of 404 Underwood Block, Calgary, will be at the Hotel in Oyen on Saturday, November 10, for the purpose of correcting your and your children's eyes. Do not miss this opportunity.

Our ear of apples billed for to day will be on track Tuesday next (November 15) S. A. Miller.

The United Four Square Club of Oyen young people, will present an extremely humorous comic tableaux entitled "Cat Pie" in the United Church on Tuesday, November 15, at 8 p.m. All are welcome.

Under instructions from Mr. M. E. Murphy, I will sell at public auction at his place on E½ Section 36, Township 21, Range 3, (8 miles S.W. of Acadia Valley) on Friday, November 18, horses, cows, poultry and farm machinery. Lunch served. Sale to commence at 1 p.m.

#### OBITUARY

Loftus Shirley Martin

The funeral of Loftus Shirley (Sam) Martin, only son of Mr. and Mrs. L. M. Martin, of Birmingham, Eng., was conducted this afternoon by Rev. A. W. Gollmer of Ceresol, service being held in All Saints Church, Oyen at 2 o'clock and interment following at Oyen Cemetery.

The late Mr. Martin came to Oyen in the spring of the present year and after spending a short time on a farm south of town worked for Mr. G. S. Peck. He died in Oyen hospital on Monday, November 7, 4 days after an operation for intestinal colitis, at the age of 21.

The deceased was a young man of fine character and held in high esteem by all who knew him. The heartfelt sympathy of this community is extended to his bereaved parents in Eng. and as well as to Mr. and Mrs. Peck, who mourn his death deeply.

The Alberta Wheat Pool terminal at Prince Rupert loaded the first cargo of wheat from the 1926 crop for Europe this week.

Under instructions from Mrs. Daniel Macgregor, I will sell at public auction on Wednesday, November 16, cattle, poultry, farm machinery and household effects, at her home on the N.E.¼ Sec. 33, Twp. 25, Rge. 4, West of the Fourth Meridian, (12 miles south of Oyen). Sale to commence at 1 p.m.—B. H. Dial, Auctioneer.

#### WEDDING

McIntyre—Ostrander

A quiet but pretty wedding was solemnized at the United Church Manse in the evening of Friday, November 4, when Ida Louise, eldest daughter of Mr. and Mrs. C. W. Ostrander, of Winnipeg, Manitoba, was united in marriage to Mr. John James McIntyre of Oyen; Rev. H. C. Woods, officiating. The bride looked charming in a gown of shell pink embroidered of georgette and conventional bridal veil of filmy white silk tulle. She carried a spray bouquet of pink and white carnations. The wedding march was played by Miss Ella M. Church.

Immediately following the ceremony a buffet luncheon was graciously served by Mrs. Woods who was assisted by Mrs. J. McKenzie and Mrs. J. Marshall.

The annual meeting of the Alberta Wheat Pool will be held on Wednesday November 23, in Calgary. The reports for the year will be presented to the Pool delegates.

H. W. Wood, chairman of the board of directors of the Alberta Wheat Pool, told the Calgary Kiwanis Club in the course of an address, that if the farmers cannot sell their own wheat—scientifically there is little hope for agriculture in Canada.

#### NOTICE

Ratepayers of the M. D. of Golden Centre No. 272, will kindly take notice that at the meeting of Council held on Saturday, November 4th, a By-law was enacted, extending period of prohibition of stock running at large during the current year, to November 25. Also kindly take notice that our By-law No. 25, provides that "No person shall personally nor by his agent have open granaries less than seven feet high or loose grain upon any premises accessible to stock."

Dated at Ceresol, Alberta, this 5th day of November, 1927.

Ralph Greene, Sec.-Treas.
